

Personal Development

Hope you are all well!

In Post 16, part of our curriculum is developing practical work skills alongside our class work.

We learn and build lots of skills around class enterprise, work experience within school and experiences out in the community.

I know lots of you are very helpful, willing and able and have made such a great impression within your class enterprise and school-based work experience.

I have tried to adapt some of our Post 16 targets for us all to work on while in lockdown. You will know to focus on just a few activities per week or simply choose which are best suited to you!

If the weather is good I know lots of you will be getting out in the fresh air and that is great for us all 😊

You will find our practical work skills activities on the Personal Development sheet.
