

Interview tips

- Remember how important first impressions are. Make sure that you behave maturely and sensibly at all times during your interview.
- Stay calm and relax, it's ok to be nervous but remember why you want the job/ course- it's a great opportunity for you.
- If you have to wait to be called in, think over what you might say when you are asked why you want the job or to start the course.
- Try not to go off the subject during the interview, keep your answers clear and to the point
- Slow down if you think you are speaking too quickly.
- Be honest about your skills and qualifications e.g.

How are you when working with other people as a team? Give examples...

Are you a good communicator? Give examples...

Do you like to push yourself to reach your goals? Give examples...

GOOD LUCK! 😊
