Here are some ideas for easy outside movement activities for all ages

Obstacle Course

Set up your own obstacle course in the garden and get those large muscles working.

With a bit of imagination, you can set up a course out of waste materials or things found around the house and garden.

Change them regularly to make the challenge more interesting.

Here are some ideas for your obstacle course:

- Old tyres to jump into or climb over
- Boxes to climb into or use as tunnels to crawl through
- Planks of wood as balance beams
- Tree stumps
- Plastic cones (or bottles filled with sand) to weave through
- A ladder laid down on the ground (to hop into)
